- Cycle Racks and Trolley Bays
- Cricket and Golf Nets
- Machinery Enclosures
- Safety Rails at Motorway Signage
- Exhibition Stands & Displays
- Roof Top Safety Rail
- Temporary Buildings
- Disabled Access Ramps

The **INTERCLAMP ASSISTIT RANGE** has been specially designed to help compliance with the Disability Discrimination Act (DDA) and the Building Regulations Part M:2004. Unlike many brands, the Assist range is assembled very quickly and easily by hexagon key, with no riveting, drilling of tube, welding, threading or specialist tools required. Furthermore, no other special fittings are required, which enables full integration with both new Interclamp systems and the refurbishment or upgrading of existing tubular structures to help meet the newer access specifications.

In order to meet the requirements of the above standards, the range forms flush joints with size C42 tube. Tube (and fittings where necessary) may be coated in BS or RAL colours to help meet "not cold to the touch" and contrasting colour requirements. Steps and disabled access slopes may easily be accommodated, facilitating compliance with public access standards.
